- Dessa Holm · Merrow House · Household staff
- Quin Harth · Bracken Hill Office · Executive assistant
- Joss Peller · Ninth Line Systems · Technology
- Noll Kade · Greyline EP · Executive protection

01 · FINDINGS

What we found

Top priority gaps

- 01 Money can still move because a payment change arrived by email or chat.
- 02 A live video or voice of the principal can still authorize money or access.
- 03 The principal's email can be taken over with a text-message (SMS) code.
- 04 Banking and family-office admin logins are easier to hijack than they should be.
- 05 Confidential family or office material can be pasted into a public AI tool.

Security to-do list

- 01 Research and risk-profile each regular destination: London–JFK–LAX circuit; Venice Film Festival; Sundance; Dubai; Morocco; Merrow House; Salt Cay; Kasbah Amal; Aurelian; Nightjar; N1-KS; School runs Richmond and Santa Monica — Quin Harth.
- 02 No payment or wire changes from email — two people, known bank number, no exceptions.
- 03 Verification ritual that survives a perfect deepfake video of the principal.
- 04 Hardware key or passkey on principal email (not SMS).
- 05 Hardware key or passkey on banking and family-office admin accounts.
- 06 Ban confidential family, legal, and financial data from consumer AI.

What to watch for

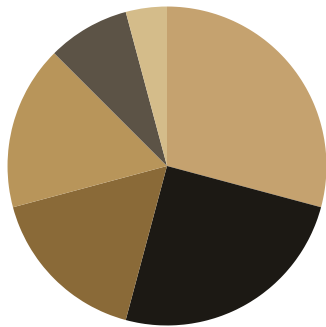

- Phone-number hijack against principals.
- Deepfake video call wire authorization.
- Staff & adviser leakage into public AI.
- AI-accelerated public research and targeting.
- Children's AI companions and cloud cameras.
- Family office wire fraud.
- Smart-home integrator persistent access.
- Public-record stalking and targeting.

- Yorick Pimm · House manager · 1

These rows are for the people in the room. Ask until a row is clear. Nothing here is closed until someone says so.

ACTION	WHO	WITH	WHEN	DONE LOOKS LIKE
Research and risk-profile each regular destination: London–JFK–LAX circuit; Venice Film Festival; Sundance; Dubai; Morocco; Merrow House; Salt Cay; Kasbah Amal; Aurelian; Nightjar; N1-KS; School runs Richmond and Santa Monica	Quin Harth	Executive assistant	This week	One page per place: who goes, when, what can go wrong, who owns the trip
No payment or wire changes from email — two people, known bank number, no exceptions	Lumen Voss	Bank / family office	This week	Bank dual-control on file; last wire traced end to end
Verification ritual that survives a perfect deepfake video of the principal	Kit Solenne	Family / staff / family office	This week	Family demonstrates the second-channel ritual on a fake “urgent” call
Hardware key or passkey on principal email (not SMS)	Kit Solenne	Principal / IT	This week	Principal login shows a hardware key or passkey
Hardware key or passkey on banking and family-office admin accounts	Lumen Voss	Bank / family office	This week	Admin login demo without SMS codes only
Ban confidential family, legal, and financial data from consumer AI	Quin Harth	Executive assistant /	This week	Written ban list; spot-check of one assistant

ACTION	WHO	WITH	WHEN	DONE LOOKS LIKE
		family office		or adviser chat history
Named allowed vs banned AI tools, in writing	Quin Harth	Executive assistant / family office	This week	The assistant can name banned tools without looking them up
Write and drill the wire procedure with the people who actually send money	Family office / bank	Family office / bank	This week	Last wire walked step by step against the written procedure
Name who holds final security authority for the household and office	Ivo Marrow	Principal / counsel	This week	One-page authority memo the executive assistant can produce
No AI agent may initiate or approve wires or payee changes	IT / family office	IT / family office	This week	Agent permission review with no payment path
